

SMART Alerts Software

Our SMART Suite **SMS & Email** messaging system empowers educational institutions to instantly communicate with an entire student community / Professors / non-technical staff and parents in a matter of seconds. With our (SMS) text messaging software you can send out text alerts, which will be delivered to phones

SMS messaging solution has grown enormously in popularity as a communication tool. On an average more than 90% of Mobile phone users read SMS immediately and majority of parents, teachers and kids now carry cell phones. This means SMS messaging can provide schools, colleges & universities with an immediate, reliable and cost-effective method for contacting parents and students instantly.

Reduce the cost by sending SMS instead of making calls
